WEDNESDAY, MARCH 29, 1905.

NOTICES TO MARINERS.

The following Notices are published for general information.

W. A. Inglis,
Secretary, Marine Department.

Calcutta, *the 24th March 1905.*

AUSTRALIA—Queensland—Port Douglas.

New entrance channel—Directions to enter the inlet.

No. 93 (first publication).—The Port Master, Brisbane, has given notice (No. 1 of 1905) that, on and after 1st March, the small light showing a white sector, and the leading beacons carrying green lights at night, for crossing the Bar, will be discontinued, and a pair of white triangular beacons, with vertical black stripe in centre, carrying white lights at night, will be exhibited from Magazine Islet, bearing in line N. E. by N. ½ N.

These lights and beacons in line lead through the centre of the recently dredged channel, 200 feet wide, across the Bar, with a depth of 10 feet at L. W. S. The depth in the Inlet up to the wharves remains as before, *i.e.*, 5 to 6 feet at L. W. S. Dredging operations to form a basin will continue in progress.

Directions.—To enter the Inlet, bring the pair of triangular beacons or white lights at night in line bearing N. E. by N. ½ N. when approaching Island Point. Keep these marks in line until the existing pair of beacons, carrying red lights at night, bearing N. ½ E., come in line, when proceed on the latter line as heretofore.

Australia Directory, vol. 2; Admiralty Chart No. 2924 (old).

AUSTRALIA—Wide Bay Bar.

Approximate position, lat. 17° 41¼′ S., long. 178° 51¼′ E.

Also, that after the same date a *green fixed* light would be established on the south-eastern extremity of Queen's wharf, situated about half a cable N. 28° E. from Naquima point. This is in addition to the green light on the north-east extreme of the same wharf.

Non-existence of shoal.

No. 96 (*first publication*).—The British Admiralty has given notice (No. 147 of 1905) that a careful search made by divers, and also by use of the lead, failed to find the 25 feet patch shown on the Chart at a distance of 2½ cables S. 60° E. from Grafton point in the western entrance to Wei Hai Wei; it is considered, therefore, that this solitary sounding was due to an error in the original copy of the survey sent into Office, and should have been 35 instead of 25; it has in consequence been expunged from the Chart. There is, however, a depth of 30 feet, rock, to the north-eastward of the position where 25 feet was shown. From it the north-eastern extreme of Pei Shan point bears N. 32° W., distant 3¾ cables, and the south extreme of King Hall point S. 74° W.

Surveying Vessel *Rifleman*, when engaged in the survey of these waters, passed close to, if not over, the reported position without observing any indication of shoal water, and since then the Master of the British ship *William Le Lacheur* reports having obtained a sounding of 25 fathoms, sand, in the reputed place of the shoal, but saw no signs of any danger; there was, however, an accumulation of sea-weed and fish spawn, which the Master of the *Gesine Bronsbank* probably mistook for a shoal. It is considered, therefore, that this shoal does not exist, and it has consequently been expunged from the Charts.

All the remainder of the spar buoys except that from which the single tree bears N. 76° 28′ E. have lost their tops, and are now only plain spars very difficult to pick up.

The red iron pile beacon is leaning considerably to one side, and is liable to be washed away, as also are all the spar buoys.

This Notice affects the following Admiralty Chart:—Abu Shahr or Bushire No. 27, and Sailing Directions, Persian Gulf Pilot, Fourth edition, 1898, page 270.

Shatt-al-Arab—Alterations and corrections in the position of buoys at the entrance.

No. 156 (first publication).—In continuation of Notice to Mariners No. 124, dated 20th April 1905, the Bombay Government has given notice (No. 39 of 1905) that the three inner buoys at the entrance to the Shatt-al-Arab river have been moved from the positions in which they were found by R. I. M. S. 'Investigator' as follows:—

No. 1 Buoy	N. 65° E.	5¾	cables to Western edge of deep water channel.
No. 2 „	N. 71° E.	7¾	„ „ „ „ „ „ „ „
Bar Buoy	N. 85° E.	11¼	„ „ „ „ „ „ „ „

The positions of all the buoys shown on Admiralty Chart No. 1235 'Mouths of the Euphrates' were found to be incorrect, they now lie in the following positions and depths of water at low water spring tides:—

Outer buoy ...	in 16 feet	bearing	S. 52° E.	dist.	15·2	miles	from Fao Light.
R. W. V. S. buoy known locally as Lawrence buoy ...	in 11	"	S. 53° E.	"	11·5	"	" " "
No. 1 buoy ...	in 10	"	S. 60° E.	"	9·35	"	" " "
No. 2 " ...	in 9	"	S. 65° E.	"	7·7	"	" " "
Bar " ...	in 10	"	S. 68° E	"	6·3	"	" " "

There is a depth of 10 feet immediately outside No. 2 buoy. In addition to the above there are three small red spar buoys which mark the eastern side of the channel, but they are very difficult to pick up, they lie in the following positions:—

Outer spar buoy A	in 10 feet	S. 81° E.	dist.	8	cables	from new position of No. 2 buoy.
Middle " B	in 11 "	N. 8° E.	"	5	"	" " " " " "
Inner " C	in 11 "	N. 26° W.	"	7½	"	" " " " of Bar buoy.

Directions for entering the Shatt-al-Arab river.—Pass a convenient distance westward of the outer buoy and steer N. 60° W. until Lawrence buoy bears N.-N.-W. when shape course to pass close to the westward of it (remembering a depth of 7 feet exists 3 cables from the buoy), when abreast of Lawrence buoy steer to pass one cable eastward of No. 1, No. 2 and the Bar buoys, on reaching the latter shape course for Fao light, situated at the telegraph station easily recognized on account of the size of the buildings, which are the largest on the Turkish side of the river.

The above directions if followed will carry 9 feet least water up to the Lawrence buoy, after that is passed the general depth to the gut off No. 1 is 9 feet, but there are several small lumps of 7 feet, all of which it is impossible to avoid. Abreast of No. 1 the depth is from 17 to 18 feet in mid-channel, the water shoals very rapidly towards the spar buoys where the bottom is fairly hard, but gradually towards the iron buoys where the bottom is very soft. Between No. 2 and the bar buoy there is a small bar of 12 feet, after which good water will be carried up to the deep water off Fao.

All bearings are true.

Approximate position, lat. 29° 50′ N., long. 48° 30′ E.

This shoal was reported to have been seen by the German ship *Gesine Bronsbank* in 1879, but apparently no soundings were taken. Some years previously to this H.M. Surveying Vessel *Rifleman*, when engaged in the survey of these waters, passed close to, if not over, the reported position without observing any indication of shoal water, and since then the Master of the British ship *William Le Lacheur* reports having obtained a sounding of 25 fathoms, sand, in the reputed place of the shoal, but saw no signs of any danger; there was, however, an accumulation of sea-weed and fish spawn, which the Master of the *Gesine Bronsbank* probably mistook for a shoal. It is considered, therefore, that this shoal does not exist, and it has consequently been expunged from the Charts.

No. 2 „ N. 71° E. 7¾ „ „ „ „ „ „ „ „
Bar Buoy N. 85° E. 11¼ „ „ „ „ „ „ „ „

The positions of all the buoys shown on Admiralty Chart No. 1235 'Mouths of the Euphrates' were found to be incorrect, they now lie in the following positions and depths of water at low water spring tides:—

Outer buoy ...	in 16 feet	bearing	S. 52° E.	dist.	15·2 miles	from	Fao	Light.
R. W. V. S. buoy known locally as Lawrence buoy ...	in 11 „	„	S. 53° E.	„	11·5 „	„	„	„

The above directions if followed will carry 9 feet least water up to the Lawrence buoy, after that is passed the general depth to the gut off No. 1 is 9 feet, but there are several small lumps of 7 feet, all of which it is impossible to avoid. Abreast of No. 1 the depth is from 17 to 18 feet in mid-channel, the water shoals very rapidly towards the spar buoys where the bottom is fairly hard, but gradually towards the iron buoys where the bottom is very soft. Between No. 2 and the bar buoy there is a small bar of 12 feet, after which good water will be carried up to the deep water off Fao.

All bearings are true.

This shoal was reported to have been seen by the German ship *Gesine Bronsbank* in 1879, but apparently no soundings were taken. Some years previously to this H.M. Surveying Vessel *Rifleman*, when engaged in the survey of these waters, passed close to, if not over, the reported position without observing any indication of shoal water, and since then the Master of the British ship *William Le Lacheur* reports having obtained a sounding of 25 fathoms, sand, in the reputed place of the shoal, but saw no signs of any danger; there was, however, an accumulation of sea-weed and fish spawn, which the Master of the *Gesine Bronsbank* probably mistook for a shoal. It is considered, therefore, that this shoal does not exist, and it has consequently been expunged from the Charts.

No. 2 „ N. 71° E. 7¾ „ „ „ „ „ „ „ „
Bar Buoy N. 85° E. 11½ „ „ „ „ „ „ „ „

The positions of all the buoys shown on Admiralty Chart No. 1235 'Mouths of the Euphrates' were found to be incorrect, they now lie in the following positions and depths of water at low water spring tides:—

Outer buoy ...	in 16 feet bearing	S. 52° E.	dist.	15·2 miles	from Fao Light.	
R. W. V. S. buoy known locally as Lawrence buoy ...	in 11 „ „	S. 53° E.	„	11·5 „	„ „	„
No. 1 buoy ...	in 10 „ „	S. 60° E.	„	9·35 „	„ „	„
No. 2 „ ...	in 9 „ „	S. 65° E.	„	7·7 „	„ „	„
Bar „ ...	in 10 „ „	S. 68° E	„	6·3 „	„ „	„

There is a depth of 10 feet immediately outside No. 2 buoy. In addition to the above there are three small red spar buoys which mark the eastern side of the channel, but they are very difficult to pick up, they lie in the following positions:—

Outer spar buoy A in 10 feet S. 81° E. dist. 8 cables from new position of No. 2 buoy.
Middle „ B in 11 „ N. 8° E. „ 5 „ „ „ „ „ „ „
Inner „ C in 11 „ N. 26° W. „ 7½ „ „ „ „ of Bar buoy.

Directions for entering the Shatt-al-Arab river.—Pass a convenient distance westward of the outer buoy and steer N. 60° W. until Lawrence buoy bears N.-N.-W. when shape course to pass close to the westward of it (remembering a depth of 7 feet exists 3 cables from the buoy), when abreast of Lawrence buoy steer to pass one cable eastward of No. 1, No. 2 and the Bar buoys, on reaching the latter shape course for Fao light, situated at the telegraph station easily recognized on account of the size of the buildings, which are the largest on the Turkish side of the river.

The above directions if followed will carry 9 feet least water up to the Lawrence buoy, after that is passed the general depth to the gut off No. 1 is 9 feet, but there are several small lumps of 7 feet, all of which it is impossible to avoid. Abreast of No. 1 the depth is from 17 to 18 feet in mid-channel, the water shoals very rapidly towards the spar buoys where the bottom is fairly hard, but gradually towards the iron buoys where the bottom is very soft. Between No. 2 and the bar buoy there is a small bar of 12 feet, after which good water will be carried up to the deep water off Fao.

All bearings are true.

Approximate position, lat. 29° 50′ N., long. 48° 30′ E.

The positions of all the above lights, as well as those supplied by the Light's Passage Harbour Contractors, are shown on Amended Chart obtainable at these offices.

Sailing directions.

By night.—In approaching the anchorage vessels of deep draught should not bring the White Light on the old structure to bear north of N.E. by E. in order to avoid the four-fathom patch, which bears N.W. ½ N. from the Light on Wonga Shoal; then get No. 1 lead [which consists of two Red Lights vertical seven (7) feet apart and Two White Lights vertical seven (7) feet apart] in line; keep these in line passing between the Occulting Light on the Red Buoy and the Outer Green Light on the North Bank, also between the other Green Lights on the North Bank and the White Lights on the revetment mound.

Steer on the same line until the two Red Lights of No. 2 lead are coming on; then steer with them on line until the Red Light south of No. 3 Beacon is on with No. 4; then direct the course to pass a safe distance off No. 3; then steer for a like distance off No. 4, and so on from Beacon to Beacon round the point until No. 9 is reached. From a safe distance off No. 9 the Lights of No. 10 lead will be seen; keep them in line until the Red Light is about a quarter of a point open to the right of the White Light of No. 11 lead; then gradually alter the course to bring the Lights of No. 11 lead in line; keep them in line (a sharp lookout being kept for the mooring buoys on the starboard hand) until the Lights of No. 12 lead are seen coming into line; proceed as before by altering the course before the Lights are on with each other. The same applies in the change from No. 12 to No. 13 leads; when the Lights on the wharves are seen opening out off Luff Point, alter the course so as to round the point at a safe distance, and then up the centre of the Channel, looking out for the Mooring Buoys on the starboard hand.

By day.—The directions by day are the same as by night, merely substituting the Beacons for the Lights.

In going outwards the directions are just the opposite to those given for coming inwards; but in such case, in changing from one lead to another, the course should be gradually altered when abreast of the Low (Red) Beacon of each lead, excepting No 2 lead. In this case, when abreast of No. 3 Beacon gradually alter the course to bring the Light of No. 4 Beacon between the Light of No. 3 Beacon and the Red Light on the Beacon south of it, until the two Red Lights of No. 2 lead are coming in line, then bring the Red Light on with No. 4 Beacon, and proceed outwards with No. 2 lead in line.

During the progress of the work at the Light's Passage Harbour Works masters of vessels exempt from pilotage may, if they so desire, avail themselves of the services of a pilot to assist them in passing such works, either in or out, at one-half the usual rates.

If the usual exemption flag is not hoisted, it will be taken as a signal that a pilot is required. At night, if a pilot is required, the usual signal for a pilot should be shown.

N.B—Owing to the nature of the work in progress, this notice may require to be amended from time to time, and, therefore, should be treated as tentative only.

This affects Admiralty Charts 2389A and B, 1750 and 1752.

CHINA SEA—GASPAR STRAIT.

Pare Joie reef.—Its approximate position.

No. 323 (first publication).—The British Admiralty has given notice (No. 717 of 1905) that the Captain of the American S.S. *Mississippi* reports that on 10th May his vessel passed a coral reef awash, in the northern approach to Gasper strait, in approximately lat. 2° 19′ S., long. 107° 08′ E.

The position of this reported danger is about 3 miles eastward of the position assigned to the rock on which the ship *Pare Joie* struck in 1870, and remained 24 hours in a position from which Gasper island bore S. ½ E., distant 5 miles. The report from that vessel also stated that she was 4½ miles eastward of the rock marked E.D., situated on the Chart in lat. 2° 19½′ S., long. 107° 3′ E., or about 3 miles eastward from that given by the bearing, and in that now reported by the *Mississippi.*

The first position of the *Pare Joie* and the E.D. position were unsuccessfully searched for by H.N.M. surveying vessel *Hydrograaf* in 1876.

It is quite possible that the three positions which lie in the same latitude, and nearly 3 miles apart from each other, may be one and the same shoal, and near the position assigned to it by the *Mississippi*, and where no soundings have yet been taken. Pare Joie reef has therefore been transferred on the Chart to the position given by the *Mississippi* and the reef E.D. expunged.

Port Adelaide river—No. 2 light beacon removed and red light exhibited.

No. 306 (third publication).—With reference to Notice to Mariners No. 279, dated 15th July 1905, issued by this office, the President of the Marine Board, Port Adelaide, has given further notice (No. 20 of 1905) informing Masters of Vessels, Pilots and others that Deepening Operations in the vicinity necessitate the removal of No. 2 Light Beacon, and that on and after the 1st July next, a Red Light in lieu thereof will be exhibited from the Red Pile Beacon south of No. 3. This Light on with No. 4 will point out when to turn off No. 2 lead (two Red Lights) and direct the course towards No. 3 Light Beacon. It should be noted that the numbers of the outer leads have been altered.

The positions of all the above lights, as well as those supplied by the Light's Passage Harbour Contractors, are shown on Amended Chart obtainable at these offices.

Sailing directions.

By night.—In approaching the anchorage vessels of deep draught should not bring the White Light on the old structure to bear north of N.E. by E. in order to avoid the four-fathom patch, which bears N.W. ½ N. from the Light on Wonga Shoal; then get No. 1 lead [which consists of two Red Lights vertical seven (7) feet apart and Two White Lights vertical seven (7) feet apart] in line; keep these in line passing between the Occulting Light on the Red Buoy and the Outer Green Light on the North Bank, also between the other Green Lights on the North Bank and the White Lights on the revetment mound.

Steer on the same line until the two Red Lights of No. 2 lead are coming on; then steer with them on line until the Red Light south of No. 3 Beacon is on with No. 4; then direct the course to pass a safe distance off No. 3; then steer for a like distance off No. 4, and so on from Beacon to Beacon round the point until No. 9 is reached. From a safe distance off No. 9 the Lights of No. 10 lead will be seen; keep them in line until the Red Light is about a quarter of a point open to the right of the White Light of No. 11 lead; then gradually alter the course to bring the Lights of No. 11 lead in line; keep them in line (a sharp lookout being kept for the mooring buoys on the starboard hand) until the Lights of No. 12 lead are seen coming into line; proceed as before by altering the course before the Lights are on with each other. The same applies in the change from No. 12 to No. 13 leads; when the Lights on the wharves are seen opening out off Luff Point, alter the course so as to round the point at a safe distance, and then up the centre of the Channel, looking out for the Mooring Buoys on the starboard hand.

By day.—The directions by day are the same as by night, merely substituting the Beacons for the Lights.

In going outwards the directions are just the opposite to those given for coming inwards; but in such case, in changing from one lead to another, the course should be gradually altered when abreast of the Low (Red) Beacon of each lead, excepting No. 2 lead. In this case, when abreast of No. 3 Beacon gradually alter the course to bring the Light of No. 4 Beacon between the Light of No. 3 Beacon and the Red Light on the Beacon south of it, until the two Red Lights of No. 2 lead are coming in line, then bring the Red Light on with No. 4 Beacon, and proceed outwards with No. 2 lead in line.

During the progress of the work at the Light's Passage Harbour Works masters of vessels exempt from pilotage may, if they so desire, avail themselves of the services of a pilot to assist them in passing such works, either in or out, at one-half the usual rates.

If the usual exemption flag is not hoisted, it will be taken as a signal that a pilot is required. At night, if a pilot is required, the usual signal for a pilot should be shown.

N.B.—Owing to the nature of the work in progress, this notice may require to be amended fromtime to time, and, therefore, should be treated as tentative only.

CHINA SEA—Gaspar strait.

Pare Joie reef.—Its approximate position.

No. 323 (second publication).—The British Admiralty has given notice (No. 717 of 1905) that the Captain of the American S.S. *Mississippi* reports that on 10th May his vessel passed a coral reef awash, in the northern approach to Gasper strait, in approximately lat. 2° 19′ S., long. 107° 08′ E.

The position of this reported danger is about 3 miles eastward of the position assigned to the rock on which the ship *Pare Joie* struck in 1870, and remained 24 hours in a position from which Gasper island bore S. ½ E., distant 5 miles. The report from that vessel also stated that she was 4½ miles eastward of the rock marked E D., situated on the Chart in lat. 2° 19½′ S., long. 107° 3′ E., or about 3 miles eastward from that given by the bearing, and in that now reported by the *Mississippi*

The first position of the *Pare Joie* and the E.D. position were unsuccessfully searched for by H.N.M. surveying vessel *Hydrograaf* in 1876.

It is quite possible that the three positions which lie in the same latitude, and nearly 3 miles apart from each other, may be one and the same shoal, and near the position assigned to it by the *Mississippi*, and where no soundings have yet been taken. Pare Joie reef has therefore been transferred on the Chart to the position given by the *Mississippi* and the reef E.D. expunged.

CHINA SEA—GASPAR STRAIT.

Pare Joie reef.—Its approximate position.

No. 323 (third publication).—The British Admiralty has given notice (No. 717 of 1905) that the Captain of the American S.S. *Mississippi* reports that on 10th May his vessel passed a coral reef awash, in the northern approach to Gasper strait, in approximately lat. 2° 19′ S., long. 107° 08′ E.

The position of this reported danger is about 3 miles eastward of the position assigned to the rock on which the ship *Pare Joie* struck in 1870, and remained 24 hours in a position from which Gasper island bore S. ½ E., distant 5 miles. The report from that vessel also stated that she was 4½ miles eastward of the rock marked E D., situated on the Chart in lat. 2° 19¼′ S., long. 107° 3′ E, or about 3 miles eastward from that given by the bearing, and in that now reported by the *Mississippi*.

The first position of the *Pare Joie* and the E.D. position were unsuccessfully searched for by H.N.M. surveying vessel *Hydrograaf* in 1876.

It is quite possible that the three positions which lie in the same latitude, and nearly 3 miles apart from each other, may be one and the same shoal, and near the position assigned to it by the *Mississippi*, and where no soundings have yet been taken. Pare Joie reef has therefore been transferred on the Chart to the position given by the *Mississippi* and the reef E.D. expunged.

Further information, dated 24th August 1905, has been received through the Board of Trade that Mr. W. D. Prideaux, commanding U.S. naval collier *Nanshan*, sent from Manila to relieve the crew of the British barque *West York*, wrecked on a reef south-eastward from North Danger reef in the China sea, makes the following report respecting some islands and dangers between North Danger reef and Palawan :—

(*a*) Flat island was found to be a flat low sandy island about 250 yards across. A reef extends in an easterly direction from it for a distance of 2 to 3 miles, and several discoloured patches were observed to the N.N. Eastward. The position of the island was ascertained to be lat. 10° 48′ 15″ N., long. 115° 50′ 30″ E., or about 16 miles to the south-eastward of the position shown on the Charts. The position formerly given, lat. 11° 3′ N., long. 115° 42′ E., was passed over without any sign of land being observed.

(b) Nanshan island. An island (now named Nanshan) covered with small trees, and about 600 yards across, was observed to be situated about 6 miles S. 12° W. from Flat island, in approximately lat. 10° 42′ 30″ N., long. 115° 49′ 30″ E.

(c) West York island. This island is about one mile long and half a mile broad, covered with grass and trees, some of which are cocoanut palms; it is fringed with a reef which extends from it a quarter of a mile on the eastern side to fully 2 miles on the northern side, on the latter reef the ship *West York* was wrecked. An anchorage was found in 14 fathoms, coral with the north point of the island bearing S. 25° W., distant 2½ miles. Signs of former Chinese habitation were found, and it is apparently visited every year by fishermen from Hainau for the purpose of collecting Trapang, &c. The position of the island was ascertained to be lat. 11° 5′ 45″ N., long. 115° 1′ 30″ E.

The remark on the Chart to the effect that its position was 8 miles to the eastward has therefore been erased.

The approximate position of Durour island was ascertained to be N. 30° E., distant 19 miles from Maty island, which places it in lat 1° 29′ S., long. 142° 57′ E., or about 16 miles to the westward of its present position on the Chart.

Prideaux, commanding U.S. naval collier *Nanshan*, sent from Manila to relieve the crew of the British barque *West York*, wrecked on a reef south-eastward from North Danger reef in the China sea, makes the following report respecting some islands and dangers between North Danger reef and Palawan:—

(*a*) Flat island was found to be a flat low sandy island about 250 yards across. A reef extends in an easterly direction from it for a distance of 2 to 3 miles, and several discoloured patches were observed to the N.N Eastward. The position of the island was ascertained to be lat. 10° 48′ 15″ N., long. 115° 50′ 30″ E., or about 16 miles to the south-eastward of the position shown on the Charts. The position formerly given, lat. 11° 3′ N., long. 115° 42′ E., was passed over without any sign of land being observed.

(c) West York island. This island is about one mile long and half a mile broad, covered with grass and trees, some of which are cocoanut palms; it is fringed with a reef which extends from it a quarter of a mile on the eastern side to fully 2 miles on the northern side, on the latter reef the ship *West York* was wrecked. An anchorage was found in 14 fathoms, coral with the north point of the island bearing S. 25° W., distant 2½ miles. Signs of former Chinese habitation were found, and it is apparently visited every year by fishermen from Hainau for the purpose of collecting Trapang, &c. The position of the island was ascertained to be lat. 11° 5′ 45″ N., long. 115° 1′ 30″ E.

The remark on the Chart to the effect that its position was 8 miles to the eastward has therefore been erased.

The approximate position of Durour island was ascertained to be N. 30° E., distant 19 miles from Maty island, which places it in lat 1° 29′ S., long. 142° 57′ E., or about 16 miles to the westward of its present position on the Chart.

Flat, Nanshan, and West York islands—Positions and particulars given.

No. 460 (third publication.)—The following Notice to Mariners (No. 1105 of 1905) issued by the British Admiralty is republished, in continuation of this office No. 458, dated the 25th November 1905.

Further information, dated 24th August 1905, has been received through the Board of Trade that Mr. W. D. Prideaux, commanding U.S naval collier *Nanshan*, sent from Manila to relieve the crew of the British barque *West York*, wrecked on a reef south-eastward from North Danger reef in the China sea, makes the following report respecting some islands and dangers between North Danger reef and Palawan:—

(*a*) Flat island was found to be a flat low sandy island about 250 yards across. A reef extends in an easterly direction from it for a distance of 2 to 3 miles, and several discoloured patches were observed to the N.N. Eastward. The position of the island was ascertained to be lat. 10° 48′ 15″ N., long. 115° 50′ 30″ E., or about 16 miles to the south-eastward of the position shown on the Charts. The position formerly given, lat. 11° 3′ N., long. 115° 42′ E., was passed over without any sign of land being observed.

(*b*) Nanshan island. An island (now named Nanshan) covered with small trees, and about 600 yards across, was observed to be situated about 6 miles S. 12° W. from Flat island, in approximately lat. 10° 42′ 30″ N., long. 115° 49′ 30″ E.

(*c*) West York island. This island is about one mile long and half a mile broad, covered with grass and trees, some of which are cocoanut palms; it is fringed with a reef which extends from it a quarter of a mile on the eastern side to fully 2 miles on the northern side, on the latter reef the ship *West York* was wrecked. An anchorage was found in 14 fathoms, coral with the north point of the island bearing S. 25° W., distant 2½ miles. Signs of former Chinese habitation were found, and it is apparently visited every year by fishermen from Hainan for the purpose of collecting Trapang, &c. The position of the island was ascertained to be lat. 11° 5′ 45″ N., long 115° 1′ 30″ E.

Maty and Durour islands—positions of.

No. 461 (third publication).—The British Admiralty has given notice (No. 1107 of 1905) that the Master of the S. S. *African Monarch* reports that, during the passage of his vessel from Newcastle, N.S.W., to Manila, he passed between Maty and Durour islands on the north-east coast of New Guinea at a distance of 7½ miles from Maty island, and found the position of that island practically correct. The remark on the Chart to the effect that its position was 8 miles to the eastward has therefore been erased.

The approximate position of Durour island was ascertained to be N. 30° E., distant 19 miles from Maty island, which places it in lat 1° 28′ S., long. 142° 57′ E., or about 16 miles to the westward of its present position on the Chart.
